Abstracts

Automotive brake rotors are flat, round piece of metal, onto which brake pads are mounted on to stop the vehicle. The automotive brake rotors form a vital part of the vehicle's braking system and are also known as discs in the automotive terms. The Rotor is the brake disk that attaches to the wheel of the car. In a disc brake system, the brake pad is pressed against the rotor with a set of calipers. The friction it causes enables the car to slow down and stop.
