## Abstracts

For the past decade, high volume growth in vehicle sales has created problems for automotive manufacturers, garages stations, and tire vendors. Compared to the fleet of vehicles that hit the roads every year, garage owners have faced difficulties while handling these large number in limited work spaces. From an OEM standpoint, manufacturing vast units of vehicles demands a greater utility of lifting systems, considering the confined spaces of manufacturing plants. Automotive lifts have served a key purpose of space optimization in today's automotive landscape.

Based on the Automotive Lifts market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
