Abstracts

It is the exchange of data among operational processes and their applications, whether in one enterprise or across multiple ones. A common example would be a manufacturing firm and the ecosystem of supplier and distributor companies around it. In such examples, many enterprises are involved. However, large firms with multiple, independent business units often practice B2B DE as part of their inter-unit communications within a single enterprise. Hence, B2B DE scales up to global partner ecosystems, but it also scales down to multiple business units of the same enterprise.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the B2B Data Exchange market covering all its essential aspects.
