Abstracts

It is the exchange of data among operational processes and their applications, whether in one enterprise or across multiple ones. A common example would be a manufacturing firm and the ecosystem of supplier and distributor companies around it. In such examples, many enterprises are involved. However, large firms with multiple, independent business units often practice B2B DE as part of their inter-unit communications within a single enterprise. Hence, B2B DE scales up to global partner ecosystems, but it also scales down to multiple business units of the same enterprise. Based on the B2B Data Exchange market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
