## Abstracts

BabyNes uses a proprietary single-use capsule of milk powder with water to create a single serving of infant formula. Nestl? has called the technology 'state-of-the-art' and emphasized its hygiene, speed, and ease. The company said that the machine prepares the formula 'at precisely the right dosage and temperature, at the push of a button, in less than one minute'. The capsules come in two sizes and six formulations based on the baby's age and weight. The machine comes with a chip to confirm the capsules' authenticity.

Based on the BabyNes market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
