Abstracts

Jugyeom ,also known as bamboo salt, is prepared by packing bay salt in a thick bamboo stem and baking them on high temperature using pine tree firewood for nine times.This unique baking method is the secret that transforms ordinary bay salt to a healthy food product. During the repetitive baking processes, the impurities in the bay salts are either removed or neutralized while its inorganic ion contents, such as calcium, potassium, iron, copper, and zinc are increased, making the finished product contribute greatly to the maintenance of ion balance.
