Abstracts

The bay leaves, scientifically known as *Laurus Nobilis* are leaves of a small tree found in the Mediterranean region. The world over the presence of Laurel trees has now declined due to the changing global climate scenario. The various types of bay leaves include California bay leaf, Bay laurel, Indonesian bay leaf, Indian bay leaf, or Indonesian laurel, West Indian bay leaf and Mexican bay leaf. They are used for culinary and medicinal applications since historical times. They are also used in fish sauces, stews, soups, meat, and confectionaries. The leaves, as well as fruits, contain narcotic, stimulant and properties. The oils extracted from the leaves are also used in the spices and as flavorings in the food. Bay Leaves also have hypoglycemic, anti ulcerogenic, anti-bacterial and anti-fungal properties.

Based on the Bay Leaf market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
