## Abstracts

Beer is one of the oldest and most popular drinks in the world. Beer is classified according to the type of yeast used for brewing, such as beer, beer or wild yeast. It also includes a variety of products, such as non-alcohol and alternative types. Cider is the latest of both, mainly used as a gluten-free alternative to beer. It consists of fruit juice, mainly apple.

Based on the Beer & Cider market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
