Abstracts

Benzene is one of the natural components of crude oil. It is a highly flammable colorless liquid with a sweet odor. Benzene is primarily used as an intermediate to make chemicals such as styrene, ethylbenzene, cumene, cyclohexane, and nitrobenzene. More than 50% of the entire benzene produced is processed into styrene, which is used to make plastics and polymers. A small amount of benzene is used to make rubbers, detergents, explosives, lubricants, dyes, drugs, and pesticides.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Benzene market covering all its essential aspects.
