Abstracts

Blended learning combines traditional face-to-face interaction with WBL. This mode of learning is prevalent in the K-12 segment. To meet with the evolving needs of students and academicians, regulators in the education industry worldwide are emphasizing on this education methodology than traditional learning methods. Blended learning has made knowledge delivery more productive and efficient as instructors share their resources and instructions online, enabling students to access these resources at their convenience. Many investors, globally, are also thus investing in the fields of education and technology.
Based on the Blended Learning market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
