Abstracts

Blockchain is a distributed ledger technology that represents most of the content. It promotes consensus because it is a record-keeping platform. It is transparent because participants in the chain can download and verify individual ledgers. It is permanent because those ledgers cannot be changed. Like education, blockchain not only transmits content but also conveys the value inherent in the content.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Blockchain in Education market covering all its essential aspects.
