Abstracts

Laminated glass is a type of safety glass that holds together when shattered. In the event of breaking, it is held in place by an inter-layer between its two or more layers of glass. The inter-layer keeps the layers of glass bonded even when broken, and its high strength prevents the glass from breaking up into sharp pieces. This produces a characteristic “spider web” cracking pattern when the impact is not enough to completely pierce the glass.

The Bulletproof Laminated Glass market revenue was xx Million USD in 2016, grew to xx Million USD in 2020, and will reach xx Million USD in 2026, with a CAGR of xx during 2020-2026.
