## Abstracts

A VoIP business service uses your existing Internet connection to connect with a hosted PBX (private branch exchange). A hosted PBX is the system by which phone calls are routed into and out of your office. Hosted PBXs may be managed in off-site locations, or they may be virtual systems, which are hosted entirely online (via cloud technology). With a hosted PBX, you can help your business save valuable resources that could be better used in other ways.

Based on the Business Voip market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
