Abstracts

Camel Milk is unfamiliar to many people, but in many countries it has been considered an irreplaceable nutrient. In Africa, it is often recommended that people with frailty drink camel milk in order to enhance the body's resistance. According to the UN Food and Agriculture Organization, in addition to being rich in vitamin C, camel milk also contains a large amount of unsaturated fatty acids, iron and vitamin B needed by the human body. Although the taste is somewhat saltier than milk, it is already very popular. At the same time, camel milk also provides a source of income for the nomads.
