Abstracts

Leasing a car is a system of possessing a brand new or used car by paying to use it for a definite time. Many vendors offer a range of vehicles that can be leased by customers for a period as and when required. Leasing is similar to renting a car; however, the former is for a relatively longer period. It involves two parties: A lessor and a lessee. Car leasing is not as same as buying a car or renting one. It is an arrangement where in a customer pays to the leasing company for the right to drive a car. The monthly payments that are made as a part of lease agreement do not add to the lessee's equity (ownership) in the car. The monthly payments just allow the customer to drive the vehicle for a specified period, which is usually 2-3 years.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Car Leasing market covering all its essential aspects.
