Abstracts

Leasing a car is a system of possessing a brand new or used car by paying to use it for a definite time. Many vendors offer a range of vehicles that can be leased by customers for a period as and when required. Leasing is similar to renting a car; however, the former is for a relatively longer period. It involves two parties: A lessor and a lessee. Car leasing is not as same as buying a car or renting one. It is an arrangement where in a customer pays to the leasing company for the right to drive a car. The monthly payments that are made as a part of lease agreement do not add to the lessee's equity (ownership) in the car. The monthly payments just allow the customer to drive the vehicle for a specified period, which is usually 2-3 years.

Based on the Car Leasing market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
