Abstracts

Cultivated in around a hundred countries worldwide, cassava (*Manihot esculenta*) represents one of the most popular staples in the tropical region. It is a relatively cheap raw material for starch production and has a higher concentration of starch as compared to other starch sources such as rice, sweet potato, wheat and maize. Furthermore, it has a high level of purity, excellent textural and thickening properties and a neutral taste.

Based on the Cassava market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
