Abstracts

CBD is one of the more than 85 cannabinoids so far identified in marijuana and hemp. Unlike the better-known compound tetrahydrocannabinol (THC), CBD is not psychoactive, meaning it won't cause a high. Thousands of studies have shown that CBD possesses an array of therapeutic benefits, including antioxidant and neuroprotective properties.

CBD oil can be used topically to treat skin conditions. Studies show CBD oil has a high potential for treating skin conditions like eczema by encouraging abnormal cell death. It can also help regulate the skin's oil production, reducing acne. CBD also contains many nutrients like vitamin E that help improve and protect the skin.

Based on the CBD Oil in Beauty Products market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
