## Abstracts

Cheese powder is essentially dehydrated cheese. It can be made a number of ways, but the most common commercial procedure is to melt fresh, whole cheese and spray it through a hot dryer, producing a thick, velvety powder that can then be added to popcorn, to bread and sauces, and, oddly enough, to homemade cheese recipes. Based on the Cheese Powder market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields.
