Abstracts

Chicory Flour is obtained by grinding slices of chicory root after washing and dehydrating them. Grinding preserves all of the properties of the dehydrated root. Chicory Flour is used for the production of special bread, brioche, croissants, Vienna loaf, cakes, pan bread and puff pastry. This flour contributes to improving the richness, texture, conservation and the freezing resistance of all bread products. Furthermore, depending on how it is dosed, chicory flour can be used to flavour products.

Based on the Chicory Flour market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
