Abstracts

Circuit protection refers to the installation of fuses and circuit breakers to protect low-voltage electrical devices during power fluctuations. Frequent voltage fluctuations can damage equipment through electrostatic discharge and reduce its overall lifespan. Circuit protection devices (CPDs), such as circuit breakers, fuses, electrostatic discharge and surge protection devices, are installed to eliminate the threats of electrocution and fire. They form a key component in the manufacturing of computers, laptops, smartphones, battery packs, communication systems and portable electronics.
