The introduction of cloud computing has enhanced and simplified information governance and management capabilities. It provides a central administration and control for all resources, Service-level agreement (SLA) backed agreements, and vendor managed infrastructure. Cloud computing eliminates the need for users to update and maintain IT infrastructure necessary to store information.

The service provider takes care of all maintenance services. The user need not install any additional software to access applications and services. SLA ensures reliable delivery, management, and maintenance of information governance policies.
