## **Abstracts**

Cloud Gaming is a type of online gaming that allows gamers to access and play games that are stored on a remote server. These games can be accessed using internet-connected devices for free or by paying a subscription fee. The gamer enters the game by installing a client program that can access the server where the games are running. The main advantage of cloud gaming is that the company can upgrade the games without having to worry as much about the capabilities of users' computers.

The Cloud Gaming market revenue was xx Million USD in 2016, grew to xx Million USD in 2020, and will reach xx Million USD in 2026, with a CAGR of xx during 2020-2026.
