Abstracts

CNC turning centers are also computer controlled but are more powerful and can have 3, 4 or 5-axes with more versatile capabilities and applications such as turning, drilling, tapping, and milling using live tools with powered rotary tool turret, sub-spindle (dual spindles), Y-axis, and multiple turrets. They are usually slant-bed type and have full machine enclosures to keep chips and coolant splashes within the machine. CNC turning centers have higher production capabilities than CNC lathes.
