Abstracts

Cold-formed steel (CFS) is a kind of steel made by rolling or pressing steel into semi-finished or finished goods at relatively low temperatures (cold working). Cold-formed steel are created by the working of steel billet, bar, or sheet using stamping, rolling (including roll forming), or presses to deform it into a usable product. Cold-worked steel products, such as cold-rolled steel (CRS) bar stock and sheet, are commonly used in all areas of manufacturing of durable goods, such as appliances or automobiles, but cold-formed steel is most prevalently used for construction materials.
