Abstracts

Cold-formed steel (CFS) is a kind of steel made by rolling or pressing steel into semi-finished or finished goods at relatively low temperatures (cold working). Cold-formed steel are created by the working of steel billet, bar, or sheet using stamping, rolling (including roll forming), or presses to deform it into a usable product. Cold-worked steel products, such as cold-rolled steel (CRS) bar stock and sheet, are commonly used in all areas of manufacturing of durable goods, such as appliances or automobiles, but cold-formed steel is most prevalently used for construction materials.

Based on the Cold-formed Steel (CFS) market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields.
