Abstracts

Colon hydrotherapy unit is a safe and completely natural procedure of gentle rinsing of the colon with purified warm water, to remove encrusted fecal matter, gas and mucus, using no chemicals or drugs. In the procedure, water is gently infused into the colon via the rectum, using no drugs. Colon hydrotherapy cleanses the colon, removes stagnant fecal material from colon walls, solves intestine problems, preventing the buildup of bacterial toxins in the ports and lymphatic system, and reduces load on the liver, besides removing toxic waste. With advancement in technology, therapists use hygienic closed systems, with clean, filtered water to cleanse the colon quickly and easily, with no fuss, no mess or smell, making modern colon hydrotherapy safer. However, essence of the therapy has remained the same – a gentle wash out of the colon or large intestine, using warm water to remove waste matter, rehydrate, and exercise the bowel.
