## **Abstracts**

Community association management software provides tools for managing and organizing communities for property managers, homeowners associations (HOAs), apartment associations and cooperatives. Property managers and HOAs can use community association management software to organize their communities and ensure that all members receive the latest dues and other paperwork and ensure the meeting goes smoothly. Resident portals or community sites are often included, so residents and property managers can update important events to the community, schedule meetings or events, pay membership fees or create maintenance requests.

Community association management software is similar in many respects to association management software, but community association software is entirely focused on residential associations rather than non-profit organizations or hobby-based groups. Community association software can be integrated with property management software, multi-family software or facility management software to enable property managers to better organize their physical assets and residents.

Based on the Community Association Management Software market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
