## Abstracts

Concrete fiber is a kind of high performance fiber specially used for concrete/mortar. It can effectively control the microcracks caused by plastic shrinkage, drying shrinkage and temperature change of concrete/mortar, prevent and restrain the formation and development of primary cracks in concrete, and greatly improve the crack-proof, impermeability and abrasion resistance of concrete/mortar. Increase the toughness of concrete, thereby improving the service life of concrete.

Based on the Concrete Fiber market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields.
