## Abstracts

Copper is a metal and is indicated by the Cu symbol. It is highly conductive and thermally conductive, so it is actively used in the construction of various buildings, solar energy transmission, high-speed data transmission lines, alloy materials or telecommunication instruments, and storage of nuclear waste or superconductors. In addition to its technical use, it is also used as a wood preservative, bacteriostatic and fungicide. Because of its soft shape, it has plasticity and soft physical properties, so it is widely used in the manufacture of cables and pipes
