Abstracts

Cork is an impermeable, buoyant material. It is a hard layer of bark tissue that is mainly harvested from *Quercus suber* (softwood oak) for commercial use. The bark is unique to southwestern Europe and northwest Africa. Corks are made of Suberin, a hydrophobic substance. Due to its impermeability, floatability, elasticity and flame retardancy, it can be used in a variety of products, the most common of which is wine stoppers.

Based on the Cork Oak Stopper market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
