## Abstracts

Credentialing is a common application in corporate work. Take medical staff credentialing software as an example. Manually compiling medical staff and provider credential packets is not only slow, but it creates room for error. By automating much of the medical staff credentialing process, OnBase enterprise content management (ECM) solutions help healthcare organizations comply with Joint Commission and CMS standards. And, by tracking all applications and related data in one central and secure location, OnBase helps ensure you have complete medical provider credential packets. Based on the Credentialing Software market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
