## Abstracts

Croissant is a kind of butter of Austrian origin, flake-shaped, Viennese pastry, named after its historical crescent shape. Croissants and other viennoiserie are made from layered yeast dough. The dough is layered with butter, rolled and folded several times in a row, and then rolled into a sheet by a technique called lamination. This process produces a layered texture with a sheet-like texture similar to puff pastry.

Based on the Croissant market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
