Abstracts

Epoxy resins, a traditional material long used in various applications, such as adhesives, coatings and composite materials, is expected to be replaced with a new type of thermosetting resin, cyanate ester resins. The main reasons for this shift include low mechanical strength exhibited by epoxies and failure of epoxy resins above certain degree of high temperature. Hence, new resin system based on range of cyanate ester are being developed that are superior to epoxies and can withstand a temperature up to 200°C.
