Abstracts

Data centers are central repositories of servers, systems, storage devices, and networking equipment. Data center outsourcing is a process of outsourcing an enterprise's IT infrastructure and its management to third-party vendors that have expertise in deploying and maintaining data center facilities. These vendors provide end-to-end management of data center services and also support additional storage, security, and disaster management solutions. The outsourcing of data center services enables enterprises to focus better on their core business activities.

Based on the Data Center Outsourcing market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
