Abstracts

The term DevOps originates from development and operations, both combined to create the concept DevOps. The software development process includes aspects such as collaboration, automation, communication, measurement, and integration of information technology professionals and software developers. DevOps is a combination of various practices with the help of different technological tools and technologies. The emergence of DevOps has evolved from the concepts of “agile operations” and “agile system administration.” Increased usage and rapid adoption of technologically enabled devices such as smartphones, laptops, and tablets favor use of applications.
Based on the DevOps Certification Service market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.
