## Abstracts

Digital Writing Instruments are battery-operated writing instrument such as digital pen that enables the user to digitally record a handwritten note or drawing. A digital pen contains a universal serial bus cradle which allows the user to upload the handwritten notes to a personal computer. The pen looks similar to a regular pen and can be used in a similar way, but requires special digital paper if the user wishes to record the written data. The digital paper, has small dots on it that allow the pen to capture what has been written. Digital pens also have handwriting recognition software through which the user can convert handwritten notes into typed text. Some of the digital pens are wireless with Bluetooth technology. These pens send the captured notes or drawings directly to user's PC or cell phone.

Based on the Digital Handwriting market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.
