## Abstracts

Digital signage systems are digital displays, managed by CMS and used for advertising, marketing, and sales applications. Digital signage systems are individually addressable or centrally managed for displaying text, videos, and animated messages for information, entertainment, merchandising, and advertising to the target audience. Signages are the primary tools used by corporates and businesses to display contents required to be conveyed to target audience. Digital signage is a sub-segment of signages, used to convey messages, videos, and images in a digital format. The retail industry is one of the major segments witnessing an extensive adoption of digital signage systems to influence the buying behavior of target audience. This is achieved by promoting brand names and related products and services at several points of sale (POS) with attractive displays of offers, new products, and enhanced services.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Digital Signage Systems market covering all its essential aspects.
