Abstracts

A discrete GPU is a Graphics Processing Unit that is not part of the CPU, ie, it's a separate add in board or a separate chip on the system board (usually in laptops and AIOs.) Discrete GPUs also use their own VRAM instead of using system RAM for video processing.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Discrete GPU market covering all its essential aspects.

For the competitive landscape, the report also introduces players in the industry from the perspective of the market share, concentration ratio, etc., and describes the leading companies in detail, with which the readers can get a better idea of their competitors and acquire an in-depth understanding of the competitive situation. Further, mergers & acquisitions, emerging market trends, the impact of COVID-19, and regional conflicts will all be considered.
