## **Abstracts**

Discrete manufacturing technique is used to manufacture distinct products as it is capable of being easily seen, touched, and counted. Product lifecycle management (PLM) is an information management system that can integrate data, processes, business systems and, ultimately, people in an extended enterprise. PLM software allows you to manage this information throughout the entire lifecycle of a product efficiently and cost-effectively from ideation, design and manufacture through service and disposal.

Based on the Discrete Manufacturing and PLM market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields.
