Abstracts

Dispersants are also known as dispersing agents or plasticizers. They are non-surface active polymers used for the prevention of clumping and to help in separation of particles. These agents consist of surfactants, which act as chemical compounds and reduces surface tension, in turn, preventing the coagulation or settling of particles. Based on the Dispersants market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail.
