Abstracts

The distribution franchise (DF) model comes as an opportunity to bring down the spiralling losses, while also providing business opportunities to private players and enhanced services to consumers. Also, unlike outright privatisation, the DF model offers the best of both worlds public ownership of assets and private management of operations. Further, it also brings in the much-needed investment in the distribution segment.

Based on the Distribution Franchise market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
