## Abstracts

E-Juice is the fluid that fuels the Electronic Cigarette. It is what provides the nicotine solution and the flavoring to your Electronic Cigarette. It creates the vapor in which you exhale that mimics the traditional smoke from analogue cigarettes. E-Juice uses base ingredients to create a smooth flavor. This base can consist of PG (Propylene Glycol), VG (Vegetable Glycerin) or both. Most of our E-Juice have mixes containing 70% PG/VG 30% to 50% PG/VG 50%. PG and VG are combined with natural or artificial flavors such as vanilla or apple which creates unique and satisfying recipes. Based on the E-Juice market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
