## **Abstracts**

Content management systems for education are simply those that are focused and sometimes expressly built just for educators and those working in large institutions. Much like with any CMS, there are content creators on the back end, and end users on the front end. The teachers and administrators create content in the form of grades and progress reports, for example. Parents and students can then simply visit a central website for a school or district to get the information they need.

Based on the Education Content Management market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.

In chapter 3.4, we provide the influence of the crisis on the industry chain, especially for marketing channels.

In chapters 8-13, we update the timely industry economic revitalization plan of the country-wise government.
