Abstracts

Engineered Quartz Stone (EQS) is made of polished or engineered quartz composite natural sheet. Quartz is one of the hardest natural materials on the planet and looks like granite. It consists of silicon dioxide. Pure natural quartz plates are very expensive and are therefore very rare as countertops. The engineering type consists of 93% to 97% ground quartz combined with resin, binder and pigment.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Engineered Quartz Stone (EQS) market covering all its essential aspects.
