Engineered Quartz Stone (EQS) is made of polished or engineered quartz composite natural sheet. Quartz is one of the hardest natural materials on the planet and looks like granite. It consists of silicon dioxide. Pure natural quartz plates are very expensive and are therefore very rare as countertops. The engineering type consists of 93% to 97% ground quartz combined with resin, binder and pigment.

Based on the Engineered Quartz Stone (EQS) market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields.
