In contrast to the EPC model, the EPCM contractor is not directly involved in the building and construction of the project, but is rather responsible for the detailed design and overall management of the project, on behalf of the owner or principal. The EPCM model can be regarded as a professional services contract.

The EPCM contractor is responsible for establishing contractual arrangements on behalf of the owner or principal with other contractors, vendors, sub-contractors and sub-vendors, through a tender process. The EPCM contractor has a duty to ensure that the engineering and design of the project is in compliance with the projects technical and functional specifications. Supervising, management and coordinating construction interface in accordance with a detailed schedule is the key responsibility of the EPCM contractor.
