## Abstracts

The most important job of an enterprise WLAN solution is to provide secure and robust wireless service to users. WLANs are less secure by their nature than wired LANs. Wi-Fi uses unlicensed bands that anyone can use freely, and thus is inevitably vulnerable to various interferences, which can lead to service degradation. So, a good enterprise WLAN solution must feature functions and technologies to address these issues and supply the best wireless network service to users.

The report combines extensive quantitative analysis and exhaustive qualitative analysis, ranges from a macro overview of the total market size, industry chain, and market dynamics to micro details of segment markets by type, application and region, and, as a result, provides a holistic view of, as well as a deep insight into the Enterprise WLAN Service market covering all its essential aspects.
