Abstracts

ePRO technology is the result of electronic patient reports, collected by electronic devices such as smartphones, tablets and computers. eCOA uses advanced mobile technologies such as smartphones, tablets and personal computers to let patients, clinicians and their caregivers report results directly. eCOA generates highly accurate data to better understand the patient experience in clinical trials. An electronic medical record diary is an electronic diary or tool used in clinical trials or disease treatment to assess a patient's condition or measure treatment compliance.

Based on the ePRO, E-Patient Diaries and eCOA market development status, competitive landscape and development model in different regions of the world, this report is dedicated to providing niche markets, potential risks and comprehensive competitive strategy analysis in different fields. From the competitive advantages of different types of products and services, the development opportunities and consumption characteristics and structure analysis of the downstream application fields are all analyzed in detail. To Boost Growth during the epidemic era, this report analyzes in detail for the potential risks and opportunities which can be focused on.

In Chapter 2.4 of the report, we share our perspectives for the impact of COVID-19 from the long and short term.
