## Abstracts

Expanded polystyrene foam sheets, known as EPS, and extruded polystyrene foam, known as XPS, are both closed-cell foams with slightly different feels, densities and hardnesses. Foam Factory only carries EPS, but possesses manufacturing capabilities to produce products from XPS should a customer provide raw XPS for finishing. Polystyrene is often incorrectly referred to in generic terms as “Styrofoam,” which is actually a specific variety of polystyrene owned by the Dow Chemical Company. Though frequently used when referring to all-polystyrene products like drinking cups and packaging, Styrofoam is almost exclusively used as insulation and in crafting applications.
